To Whom It May Concern:

Since I have been involved with The Greater Austin Chamber, I have seen many great programs that help employers and employees alike. I have been careful in recommending something to others that I would not use myself. I am comfortable passing along "tips" that I believe will help those companies related to The Greater Austin Chamber along with their employees to help save them money and offer a better working environment.

ID Theft Solutions of America provides what they refer to as an "Affirmative Defense Response System" to help mitigate the damages and Liabilities that employers face regarding ID Theft in the workplace. I believe it to be the absolute best ID Theft and Legal protection available today to protect Employers and employees.

Upon hearing about what ID Theft Solutions of America does and considering the many benefits offered, it was easy for me to conclude that this program was one that contained significant value for Chamber members everywhere; Not only do they provide the necessary compliance documentation and training that each of your companies must have in place, but they protect your employees in the process! In fact upon offering the protection to employees, they see over a 70% participation rate... Even better yet it is 100% employee paid – there is no cost to the company unless you choose to pay for it.

I think all Greater Austin Chamber members would benefit greatly just by considering the benefits offered by ID Theft Solutions Of America. These services fall into what I would call the "no-brainer" category. For only pennies a day you can enroll employees and their families with coverage for comprehensive legal and identity theft coverage services. It is my conclusion that this will become one of the best company programs that any employer can recommend to their employees. There are already 3.5 million individuals and employees Nationwide using these benefits.

Very truly yours,

Rhonda Kelly
