

## Muleshoe Area Hospital District

*Linking Together For Life*

February 2008

To Whom It May Concern:

My Hospital has recently had the pleasure of hosting Mr. Jason Lavender with Id Theft Solutions of America, in our most recent employee training. My staff was educated on the affects of identity theft as well as how to handle the Non-Public information they deal with daily.

With the growing concern of data breaches in this country and the liabilities we have as medical institutions, I felt that implementing the NO COST programs and having a solution to protect our employees was invaluable.

I would recommend that any organization and every medical facility look to become proactive in creating an affirmative defense against Id Theft.

Sincerely,

Ray Mason

CEO

Muleshoe Area Hospital District
