To Whom It May Concern:

I am writing to offer my endorsement of ID Theft Solutions of America.

The Identity Theft Prevention Program that we have implemented with the help of IDTSOA has been an invaluable addition to protecting the data of our clients and employees. They made the process simple and easy to execute. In addition, the services that IDTSOA has made available to our employees have been very well received. The cost to our employees is minimal considering the protection provided. Many of my employees have participated in the services and have also commented on how much they appreciate the proactive approach we have taken in protecting them, their families, and our data.

I recommend IDTSOA to any company looking to be proactive in protecting their clients' data and enhancing their employee benefits. It has been a great advantage for our facility to partake in their program at NO COST.

Sincerely,

Dr. Paul Skellenger
