

July 1, 2013

Dear OHA Member,

With the increasing frequency of data breaches and identity theft, compliance has become more important than ever. New privacy laws such as HITECH and the new Omnibus HIPAA changes, are bringing higher penalties and increased expectations in prevention. Limited budgets, a lack of resources, and time have made security a check the box mentality.

To help meet these concerns, The Preferred Partner Network has chosen ID Theft Solutions of America to offer their Data Breach Prevention Program to OHA member facilities and help you be proactive!

The **NO COST** comprehensive program includes:

- Risk Assessments
- Data Breach Prevention Policy Bank (Updated Annually)
 - HIPAA Privacy & Security, IT Security, Breach Notification, NPI, Red Flags, Document Destruction, Social Media, BYOD, B.A. Agreement, & Patient Privacy notice
- Employee training and documentation
- Employee Identity protection solutions
- Notifications sent to all business associates
- Creation of a breach response task force
- Implementation of a breach response plan

Please expect a call from a representative of ID Theft Solutions of America (IDTSOA) to discuss how these services can fit your current needs or enhance any policies or security plans already in place. If you prefer to take a pro-active approach, you can reach them directly at (800) 735-4850, or www.idtsoa.com.

Thank you,

Mr. Smith
President
OHA
